

Your CONDUIT to Performance.™

PCA500 Series Hose Trolley Support Systems

The PAGE Hose Trolley Support Systems hold and secure Pre-Conditioned Air hoses within castor mounted cradles allowing for rapid deployment to service the aircraft and secure stowage to the jet bridge.

Superior Construction

Second to none in the industry. 100% Stainless Steel construction. Containment straps are 2" high-tenacity poly-propylene webbing. 1" x 5" castors to easily roll through snow.

Cost Effective

Increases the life of your Pre-Conditioned Air hoses by raising them off the ground significantly reducing the everyday wear and tear due to dragging. Increased operational performance by eliminating the need for operators to drag and roll heavy hoses to and from the servicing aircraft.

Versatile Installation

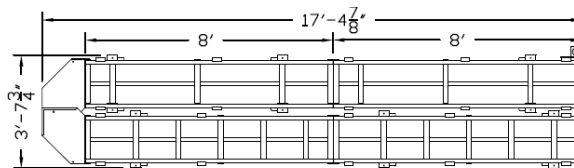

Units come in 8' sections and are easy to disassemble for shipping. Modular construction allows for various lengths and can be configured to support any aircraft. Trolley can be mounted to any passenger boarding bridge or can be fixed to a pad mount.

Call **PAGE GSE** for all the details on getting started with your PCA500 system.

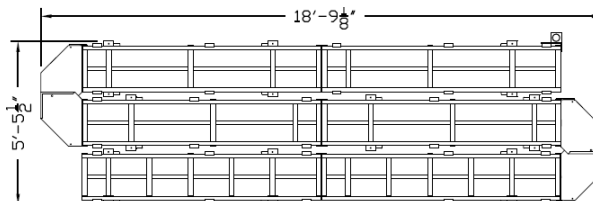

PART NUMBERS

PCA520
Two Position Hose Trolley System

Typical 2-Section Configuration (395lbs)

PCA530
Three Position Hose Trolley System

Typical 3-Section Configuration (603lbs)

PCA540
Bridge Mount Extension Kit
