

PCA610 Pre-Conditioned Air Connector

PCA650 Snap-In Replaceable Gasket

NO OTHER PCA CONNECTOR HAS ALL THESE FEATURES

PAGE GSE worked with input from the airline industry on this **PCA610 8" Pre-Conditioned Air Connector** and engineered features targeted to save you time and money.

The **PCA610** has an innovative modular design that is built to last. The connector's high-impact UV-resistant nylon is resistant to fuels and chemicals.

SUPERIOR AIRFLOW AND PROTECTIVE SCREEN

The built-in "high flow" FOD Screen prevents debris from entering the aircraft. It provides the largest internal diameter of any connector, maximizing airflow into the aircraft. No internal nuts or bolts to obstruct airflow.

INTEGRAL SPINNING PCA HOSE CONNECTION

The **PCA610** rotating ring connection eliminates twists, maximizes airflow, and will still spin under pressure. The extended ring provides a better connection.

PCA LATCH POSITION INDICATORS

It is easy to see the position of the latching jaws with a fast, positive connection.

SNAP-IN REPLACEABLE GASKET

The **PCA650 Snap-In Replaceable Gasket** is aerospace designed to change it in minutes.* There is no need to remove the connector from service when the gasket gets worn. Simply **Snap-In**.

* Periodic inspections are recommended. Gasket should be replaced when it becomes deformed.

FEATURES

- INTEGRAL SPINNING PCA HOSE CONNECTION
- INNOVATION WITH INPUT FROM THE AIRLINE INDUSTRY
- HIGH-IMPACT DURABILITY, UV, AND CHEMICAL RESISTANCE
- SUPERIOR AIRFLOW AND PROTECTIVE SCREEN
- SNAP-IN REPLACEABLE GASKET
